

**Amendments to the Specification:**

Please replace the second full paragraph on page 6 with the following amended paragraph:

The drive coupler 24 comprises a receiving area 36 for receiving the rotatable member 22 and for securing the rotatable member 22 to the wiper arm 16. Note in Fig. 3 that the rotatable member 22 is rotatably secured in a bearing 38 in the window 18 as shown. In the embodiment being described, the bearing 38 ~~may be a ? (Rick, what type of bearing would this be mounted in ?)~~ which, in turn, is mounted in an aperture 18a in the glass 18 as shown.
